SUMMARY

- Data Engineer: **streaming/batch, SQL, Spark—Jio CloudXP** at scale (millions of events/day; **Elasticsearch/Oracle**; latency/reliability).
- **Python, SQL, Kafka, PySpark/Scala Spark**; pipelines (validation, partitioning, indexing, query tuning).
- Trustworthy data: schema discipline, SLAs, quality for analytics consumers.

EXPERIENCE

- **JIO** Mumbai, India
Data Engineer Dec 2023 – Present
 - Delivered critical capabilities on **Jio CloudXP** across **data engineering**, real-time monitoring, **pipeline orchestration**, and telemetry-backed operations—15+ shipped features end-to-end.
 - Owned **production log and telemetry streaming pipelines**: **Apache Kafka** producers/consumers, micro-batching, parallel parsing, and structured sinks into **Elasticsearch** for search and analytics; sustained **100k–500k msgs/sec** and sub-second processing on millions of events/day with **~95%** latency improvement vs. prior baseline; **SQL** and rule-based checks for data quality before indexing.
 - **Scala Spark/PySpark** for **batch** logs and large transforms; **Spark SQL**-style design (select/project, shuffles, partitioning) for high-volume jobs and streaming hand-offs.
 - Built an internal AI-assisted analytics layer in **Python (LangGraph, LangChain, MCP)** with **SSE** streaming and a **RAG** stack (**Elasticsearch + FAISS**) over TB-scale telemetry for natural-language querying—**Innovation Champion** award.
 - Shipped **32+ production data-facing APIs** across 6 **FastAPI** services: **Pydantic** contracts, **async** I/O to **Oracle** and **Elasticsearch**, composite indexes, and tuned pools; domains included onboarding datasets, Kubernetes metrics, pipeline metadata, and SLA tracking—**~40%** query improvement on hot paths; **Docker** and **Kubernetes** CI/CD.
 - **CloudXP** K8s Monitoring (**22+** endpoints), **Elasticsearch/OpenSearch**: cluster/deployment/node/storage metrics, **async** scans, **PIT** pagination, CPU-heavy transforms—time-series and slice-and-dice for operators.
 - Engineered **CloudXP** Pipeline UI Core (**50+** endpoints) for pipeline CRUD, **transformations**, and plugins; **MCP** integration across 20+ platform APIs; reduced heavy in-memory **pandas** usage for **30MB+** memory savings per worker and stabilized Oracle pools.
- **WebRelier Software Solution Pvt. Ltd.** Pune, India
Software Engineer Intern Jan 2023 – Jul 2023
 - Built **Ridemate**—an Uber-like ride-hailing product on **Firebase**: real-time event ingestion, consistency guarantees, and scalable processing of rider/driver and telemetry events.

SKILLS

- **SQL & analytics**: Advanced SQL, Oracle/PostgreSQL tuning, indexing; **Search**: Elasticsearch/OpenSearch (aggregations, PIT, composite indexes).
- **Big data & streaming**: Spark (**PySpark, Scala Spark**), Spark SQL, GCP, BigQuery, micro-batching, at-least-once patterns.
- **Languages & platforms**: Python, SQL, Scala, Rust, JS/TS; FastAPI services, Redis, MongoDB, REST/gRPC; **Infrastructure**: Docker, K8s, Linux, CI/CD.

PROJECTS

- **High-throughput telemetry** (Kafka, ES, Python/Rust): Kafka ingestion, parallel parse/validate, ES indexing; backpressure, latency SLOs at **100k+ msgs/sec**.
- **K8s metrics store & API** (ES, FastAPI, SQL): **Metrics** on ES/OpenSearch; pagination, transform offload; Oracle dimensions; **REST** for dashboards.

EDUCATION

- **G. H. Raisoni College of Engineering & Management** Pune, India
B.Tech in Computer Science; CGPA: 9.02 Aug 2020 – Jun 2023
- **K.B.H Polytechnic Malegaon** Malegaon, India
Diploma in Computer Science; Distinction (89.71%) Jul 2017 – May 2020

CERTIFICATIONS

- Cloud Computing (NPTEL, Elite + Silver, Top 5%); Google Data Analytics (Coursera).
